

NEWS RELEASE

New solid dosage brochure from Copley Scientific is handbook for pharmaceutical product testing

26 September 2007: Nottingham, UK: Far from simply being sales literature, the new solid dosage brochure from Copley Scientific is a distillation of the company's recognised expertise in the area of pharmaceutical product testing. It provides detailed information for the analysis of a wide range of solid dosage forms, extensively referencing both regulatory requirements and pharmacopoeia guidance. Copley Scientific is a major supplier of solid dosage equipment, and the world's leading manufacturer of inhaler test equipment.

A clear, easy to use manual, the brochure is a valuable tool for analysts charged with the testing of creams and ointments, powders, suppositories, tablets and capsules, and transdermal patches. It is sub-divided on the basis of delivery route into three main areas – gastrointestinal, mucosal membrane and skin surface. Inhaler testing is the subject of a separate brochure.

The brochure is available, free of charge, directly from the company –
tel : +44 (0)115 961 6229 – or via the website <http://www.copleyscientific.com>

About Copley Scientific

Copley Scientific is recognised as the world's leading manufacturer of inhaler test equipment and is a major supplier of test equipment for pharmaceutical solid dosage forms, including tablet dissolution, disintegration, friability, hardness and powder testers. The company has offices in the UK and Switzerland and a partnership with aerosol particle science experts MSP Corporation in the US. Copley's broad range of testing products for metered-dose inhalers, dry powder inhalers, nebulizers and nasal sprays are supplied and supported worldwide through close relationships with specialist distributors. Serving the pharmaceutical and associated industries, Copley offers an extensive range of equipment for research, production, clinical trials and quality control, as well as full validation and aftersales service, providing a single source for products that meet individual needs.
